

3M™ Coban™ Self-Adherent Wrap

The Brand
You Trust to
Secure, Compress
and Immobilize

3M™ Coban™ Self-Adherent Wrap

For more than 40 years, 3M™ Coban™ Self-Adherent Wrap has been a market leader and a recognized, trusted cohesive wrap for securing dressings and devices, delivering controlled compression, and immobilizing injuries.

Features

- Maintains even compression over time; does not slip
- Provides excellent cohesion – sticks to itself
- Conformable; fits body contours
- Easy to apply and remove; can be re-positioned
- Does not stick to skin, hair, clothing or surgical drapes
- Lightweight, breathable and moisture resistant
- Variety of choices: latex-free, sterile, longer length, color packs

Benefits

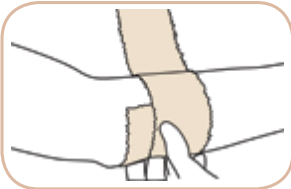

- Convenient – no pins, clips or tapes required
- Comfortable for patients
- Leaves no residue on the skin
- Protects primary dressings

Application and Removal

Step 1

Unwind 12 or more inches of Coban wrap from the roll and allow the wrap to relax. *It is important to unwind a sufficient length before beginning to wrap.*

Step 2

Without stretching, apply one full wrap and overlap. Press overlapped area lightly to keep the end in place.

Step 3

Continue wrapping*, applying tension to the wrap only to obtain desired compression.

Step 4

Cut off excess wrap; press end to secure.

* NOTE: *Remember to unwind more Coban wrap from the roll so that the product is not applied with too much tension*

Trusted Performance for a **Variety** of Applications

Suggested Applications

Secural

Secure dressings

- Ideal for patients with fragile skin or where adhesives are not desired
- In difficult-to-dress areas such as the head or fingers and toes
- After blood draws

Secure IVs and other devices

- IV and catheter stabilization
- Sterile drape stabilization in the OR
- Secure tubing, or devices such as 3M™ ColdHot packs

Compression

- Reduce edema as an overwrap for a zinc paste bandage for patients with venous insufficiency
 - *Longer length style for tall and larger patients and patients with lower extremity edema*
- Reduce post-operative swelling, such as
 - *Arthroscopic surgery*
 - *Plastic surgery, liposuction & other cosmetic procedures*

Immobilization

- Overwrap for splints, bivalve and univalve casts
- Support sprains and strains
- Positioning limbs in the OR
- Support post-cast removal
