CONTACT LENS COMPRESS

SOOTHE DRY IRRITATED EYES

Extend comfortable wearing time of contact lenses while reducing the risk of infection.

Contact lenses often cause irritation and dryness that can shorten the time you're able to wear them comfortably.

Now there's help.

Eyeleve™ by Bruder – the only eye compress created specially for contact lens wearers. Designed with patented MediBeads® and EyeOnic™ anti-microbial fabric, Eyeleve™ is convenient to use. The compress features technologies that have been clinically proven to extend comfortable wear time of contacts by up to 3 hours.

Just heat in the microwave for 20 seconds and apply for 8-10 minutes. There's no wetting, no fuss – just penetrating moist heat. Using the Eyeleve™ compress stimulates the meibomian glands to provide natural lubrication and soothe tired, irritated eyes.

Ask your eye care professional about Eyeleve™ – an easy way to improve contact lens comfort and to help maintain eye health.

EXTEND COMFORTABLE WEAR TIME OF YOUR CONTACT LENSES

- **Fast acting** – microwave activated for easy use
- **Naturally hydrating** – no need to add water
- **Patented ergonomic pod design** – includes an adjustable nose piece designed to fit all facial types, while the comfort stitch helps take pressure off the eyes
- **Patented MediBeads®** release clean moist heat – the most penetrating type of heat
- **Designed to prevent infection** – the EyeOnic™ fabric is anti-microbial
- **Washable & reusable** – simply hand-wash and let dry

Eyeleve™ IS EASY TO USE

1. **Microwave for 20 seconds**
2. **Apply for 8-10 minutes**
3. **Experience immediate, comforting relief**
